EDUCATION

B.S. | Human Centered Design & Engineering Minor | Linguistics

University of Washington, Seattle
2017-2021 | GPA: 3.98

UX Certificate in Interaction Design

Nielson Norman Group, Vancouver
August 2018 | ID 1025553

SKILLS

Figma Adobe Creative Cloud Cursor
Prototyping AI-assisted web development
Product Management Usability Testing
A/B Testing Surveys Data Analysis Rive
HTML/CSS Python

Publications, Talks & Patents

Automatic Onboarding to a Computer Application by Scraping Website Data

Patent IPR-2412979US, September 2024

- Designed an AI driven automated system for streamlining user onboarding by extracting relevant business information from websites.

Mock to Stock: Let's Jam on a Minimum Lovable Product

Workshop, 2023 Grace Hopper Conference

- Designed and facilitated a workshop guiding 80+ engineers through Intuit's design process.

Principles for Applying Augmented Reality in Manufacturing

Published paper, January 2019

- Massachusetts Institute of Technology (MIT) Undergraduate Research Technology Conference

EXPERIENCE

Design Lead, Basilica Bio Nonprofit

April 2021 - Present

- Developed branding and social media strategy responsible for a 254% increase in reach when implemented by direct reports
- Co-wrote and illustrated Navigating Food Systems in King County, a resource guide distributed 2,500+ times in the first month post print to food-insecure folks in Seattle

Smart City Tech Design Fellow

The Fulbright Program

August 2024 - Dec 2025

- One of 2 grantees selected from worldwide competition to work in Thailand for a year, researching cultural adaptation of design methods in Smart City Tech development
- Facilitated 15+ participatory design workshops across 5 NGO, private, and public orgs
- Published insights at codesignkit.org

Senior Product Designer, Onboarding, Intuit

September 2021 - August 2024

- Spearheaded a redesign of QuickBooks onboarding that caused a 37% increase in multi task completion - the highest bump our team had seen to this critical metric in 3+ years
- Designed AI-driven flows to save users time and effort bringing their data into QuickBooks
- Conducted 40+ usability tests on E2E production flows, unearthing critical usability issues that were stopping users from setting up QuickBooks successfully
- Early promotion to senior level for stellar work

HCI Researcher, Carnegie Mellon University

June 2019 - September 2019

- Designed and developed onboarding for Skeema, a tab management app from a Carnegie Mellon Lab
- Created speculative futures storyboards and interviewed users about ideal feature development
